

WCCM

I am delighted to be associated with this very important international Congress. Chinese Medicine is an essential component of the international health systems and this Congress will bring together a wide range of experts who will further explore how to optimize its contribution.

It will also be a pleasure to welcome participants to Australia where Chinese Medicine has had an important role in health care for over 150 years.

A handwritten signature in blue ink, consisting of several loops and a long horizontal stroke extending to the right.

Dr David Graham

Former National Manager of Australia's Therapeutic Goods Administration

Vice chairman, Organising committee of the Sixth World Congress of Chinese Medicine
