

陈日新教授

江西中医学院附属医院副院长; 博士研究生导师, 中国针灸学会常务理事, 江西省针灸学会会长。

主持国家、部、省、厅级针灸科研项目15项, 长期从事经穴敏化态灸疗学的研究, 在国内外刊物及学术会议上发表学术论文70余篇, 著作7部。

演讲题目:

《腧穴热敏规律的发现与热敏灸技术的创立及其临床应用》

提纲:

- 1、发现了腧穴热敏及其规律, 揭示了腧穴敏化态新内涵, 突破了长期以来对腧穴的传统认识;
- 2、解决了灸疗长期以来穴位不能准确定位、灸量不能个体化科学定量的关键技术难题, 创立了热敏灸新技术;
- 3、应用热敏灸技术治疗5种躯体痹症, 大幅度提高了临床灸疗疗效, 开创了一条治疗疾病的内源性热敏调控新途径。

Professor CHEN Rixin

Vice Superintendent, Affiliated Hospital of Jiangxi College of Chinese Medicine; Supervisor of PhD candidates; Standing committee member, China Acupuncture Association; President, Jiangxi Acupuncture Association.

Professor Chen is in charge of 15 scientific acupuncture research projects at national and provincial levels. He is a dedicated researcher in sensitisation of acupuncture points through moxibustion. Professor Chen has presented and published more than 70 papers on conferences and professional journals both China and overseas. He has also an author of 7 books.

Presentation Topic: Discovery of dermal sensitivity pattern of acupoints and creation and clinical application of dermal sensitivity moxibustion

Outlines:

1. Discovery of dermal sensitivity and its distribution of acupoints; demonstrating of new connotation of acupoints sensitisation; break through of the traditional understanding of acupoints;
2. Resolution of difficulties involving accurate localisation of acupoints and quantitative application of moxibustion on individual basis; establishment of new techniques for moxibustion based on dermal sensitisation;
3. Applied clinical treatment of five Bi syndromes using moxibustion based on dermal sensitisation, leading to significant improvement of clinical efficacy; discovery of new treatment methods, for diseases, using dermal heat sensitivity under endogenous control;
